

# Japanese App Store — bowel and gut logging apps

Supporting data for ブリストルログ / TameshiteLog. Compiled 28 August 2026.

---

## METHOD

Apps were retrieved through Apple's public iTunes Search API (country=jp, entity=software) across 25 Japanese-language query terms covering bowel movements, stool form, constipation, diarrhoea, gut care and related topics. 1,035 unique apps were returned. Of those, 225 have bowel or gut logging as their subject; games, toilet-finder maps, salon apps, a university app, a motor speedway app and a Bristol city travel guide were removed. The full 225 are listed in the appendix with their App Store identifiers, so every count below can be checked.

All judgements below are based on each app's App Store description text. The apps were not installed, so a feature present in an app but absent from its description would not be counted.

## FINDINGS

1. Apps describing a comparison between days the user did the thing and days they did not: 0 of 225.
2. Apps describing a before/after comparison of any kind: 2 of 225. Neither compares periods that the user defines with a start date and an end date. Both are set out below with the relevant text.
3. No app in the set reports adherence as counted days against a stated denominator; where adherence appears at all it is expressed as a percentage.

## THE TWO NEAREST APPS

Regularity：排便記録 — Creative Stack LLC · released 12 June 2026 · 0 ratings

「服薬の開始、食事の変化、施術などをタイムライン上にマーカーとして記録できます。」  
「マーカー以降の「前後比較」をすべての指標で確認」

A marker is a point in time. The comparison splits the timeline at that point; there is no period with a start and an end date, no warm-up exclusion, and no minimum number of days before a difference is stated.

DidYouPoop: 出た？ - 排便記録 — 鵬 杨 · released 20 March 2026 · 1 rating

「Insights では前期間との比較結果をすぐ確認できます」  
「Insights の期間比較結論」

The comparison is against the immediately preceding period of the same length, chosen by the app. The user cannot anchor it to the day they started or stopped something.

# Appendix — the 225 apps

Ordered by number of ratings on the Japanese App Store. trackId is Apple's own identifier, so any row can be looked up directly.

| App                                 | Developer                 | Released   | trackId    | Ratings |
